

Technical Specification

Wall Mount Video Kiosk (mk3)

Our wall mount kiosk is ideal for environments where space is at a premium. Retaining the innovative style of our freestanding model, this compact unit sacrifices nothing in performance or functionality.

The Video Kiosk runs our exclusive VideoBooth software offering exceptional video capturing and processing features. Our VideoBooth software also allow for the easy customisation and updating of your user interface from its powerful administration mode. Further versatility is possible with the onscreen keyboard and multiple choice questions - allowing you to capture additional data such as names, e-mail address, etc.

With an internet connection the Video Kiosk can be used as a Video Postcard machine allowing video messages to be automatically sent to e-mail addresses, websites or mobile phones. With your kiosk online you can also take advantage of our remote monitoring and administration services..
